                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  밁
                                                                                                     This invention describes novel mutant Rhizoctonia solani laccase enzymes condified to exhibit altered characteristics (e.g. pH activity profile) crelative to the wild-type enzyme. The mutant enzymes have a number of commercial and industrial applications. For example, they may be used for the polymerization of lignin (both Kraft and liganosulfaces) in solution of tignin eight lignin. They may also be used for the in situ depolymerization of lignin in Kraft pulp to produce low molecular eight lignin. They may also be used for the in compounds in liquids (for example juice may be treated with the enzyme to accelerate precipitation of the phenolic compounds in the juice to stabilize it). Additionally, it may be used to decolorize dyes and dye precursors by oxidation. The mutant laccase enzymes exhibit different characteristics to those of the wild-type enzyme. In particular, they may exhibit an altered phenolic set relative to the wild-type oxidase or altered specific activities. Additionally, they be produced in large quantities. This sequence encodes the method of the produced in large quantities. This sequence encodes the method of
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Mutant Rhizoctonia laccase enzymes useful for the polymerization depolymerization of lignin -
